

WORLD FROG DAY 2023 CELEBRATION

EVENT REPORT

The Department of Zoology organized a short programme on 20 March 2023 as part of the World Frog Day celebrations. The event included a brief lecture on "*Amphibians...Why care?*" delivered by Dr. P. Wankitlang Shangpliang, Assistant Professor of the Department. In his lecture, Dr. Shangpliang delivered a brief introduction of frogs; highlighted the distribution of amphibians in Meghalaya, their role in the ecosystem, the threats to their survival, and emphasized on the need for the conservation of these critters. This was followed by a screening of the documentary "*Frog Song - The World of Amphibians*". The documentary explores the fascinating and diverse world of frogs, toads, and salamanders. The event was concluded by Dr. Duwaki Rangad, Assistant Professor of the Department, who encouraged the students to delve into the world of these amphibians - the living fossils in a modern world. The programme was attended by 28 participants.
