## **Educational Trip to Institute of Bioresources & Sustainable Development (IBSD), Meghalaya**

**19<sup>th</sup> May 2023**

### **Report**

Educational visits have their own significance in a student's career. The primary goal of an educational tour is to provide students a glimpse into the practical applications of what they are studying in class because theoretical knowledge alone is insufficient for a successful professional career. Educational visits give students with a practical view on the world of work, with the goal of going beyond academics. It allows students to learn in a practical way through interaction and working approaches. It also provides an excellent opportunity to interact with scientists, scholars and professionals and know more about working environment. Educational visits are undertaken with the goal of giving students with practical experience in various fields.

In light of this, Department of Botany, St. Edmund's College selected 6th Semester students to visit the Institute of Bioresources & Sustainable Development (IBSD), Meghalaya on May 19, 2023.
