**MEG-CopWatch seeks to provide safety and security to women and children in distress. The application shares the live location of any person in distress to the nearest police station for a quick and guaranteed response and intervention by the police.**

The App will help make Meghalaya safe for women and children. It will provide safety for women who are studying, working, staying alone in PGs, hostels, living in remote areas, travelling at odd hours for work. It will also secure children who are living with limited parental supervision as parents have to often be away at work. This application is currently available in Khasi, English and Hindi. It is being launched in the city of Shillong and will be extended to cover all districts of Meghalaya in the upcoming months. So Meghalaya Police encourages everyone to download the MEG-CopWatch application and be ready when you are facing a challenging situation.
