

ONE-DAY WORKSHOP ON HERPETOLOGY

FLYER

EVENT REPORT

The Department of Zoology organized a One-day Workshop on Herpetology on 21 April 2023, as a part of the Centenary Celebrations of the College. The workshop was organized with the objective to *equip participants with basic knowledge in Herpetology and to impart skills in field techniques*. Further, the Workshop was expected to enlighten and engage participants in a manner that they are able: *1. to understand the role of amphibians in an ecosystem, 2. to understand the causes of population decline of frogs, 3. to be actively involved in monitoring programmes, 4. to understand how the present biodiversity crisis impacts the field of herpetology, and 5. to be equipped with skills and field-based techniques involved in herping.*

The lectures and hand-on training were deliberated by a team of two Herpetologists, Professor Saibal Sengupta, Department of Zoology, Don Bosco University, Assam; and Dr. Samrat Sengupta, Department of Zoology, Debraj Roy College, Assam. At the inaugural session held in the AV room of the College, a brief introduction to the Workshop was spelled out by Ms. Shradha Sinha, the event host. Sr. Maria, a 4th Semester student, invoked God's presence and blessings on the event. Dr. Ronald KL Tron, Head, Department of Zoology of the College, in his address, extended a warm welcome to the guests and participants, and encouraged them to be inspired and to grasp as much knowledge and skills as they could to counter threats to biodiversity, particularly amphibians and reptiles. As a token of our gratitude, the Speakers were felicitated with the Centenary memento and Ryndia shawl. The session concluded with a group photograph and a short tea break.

The technical sessions included lectures on *1. An introduction to Herpetology 2. Taxonomic landmarks 3. Study Techniques 4. Tadpole Study 5. Citizen Science*. In the first technical session, Professor Saibal Sengupta introduced the students to the *World of Amphibians and Reptiles* followed by a detailed explanation of *Taxonomic Landmarks* of the Class Amphibia which is key to the sampling and identification of amphibians. Dr. Samrat Sengupta's session delivered a lecture on *Citizen Science* and its pivotal role in today's conservation efforts. The second technical session

included a Hands-on training and focussed on the *Study Techniques*. The participants were encouraged to examine amphibian specimens based on the taxonomic landmarks. To further ignite a spark of interest in 'frogs' among the students, Dr. Samrat Sengupta presented a documentary on *Raorchestes shillongensis*, the Shillong bush frog. The last technical session was delivered on Tadpole Study by Professor Saibal Sengupta. The lecture highlighted the importance of the study of this developmental stage in amphibians.

In the Valedictory Session, the participants expressed positive feedback on the technical sessions, mentioning how the sessions were "intriguing", "insightful", eye-opening" and "enlightening". Certificates were awarded to Professor Saibal Sengupta and Dr. Samrat Sengupta, including all the registered participants. A summary of the Workshop was presented by Ms. Mebari Vanessa R Dorphang, Convener of the programme. The One-day Workshop on Herpetology concluded with a final note of gratitude by Dr. Duwaki Rangad. The Workshop was attended by 62 participants.
