

Report on Global Issues, Local Solutions: Lessons from the Pandemic to Help Mitigate Climate Change

The Department of Environmental Science under the DBT Star College Scheme organized a webinar on **“Global Issues, Local Solutions: Lessons from the Pandemic to Help Mitigate Climate Change”** on the 3rd of December, 2021. Dr. H.H. Mohrmen, Environmental Activist, was the resource person during the webinar. A total of 61 students and 7 staff attended the webinar.

Dr. Mohrmen emphasized on the role of local people in combating both local and global issues. He also emphasized on the fact that in order to combat issues at the global level there is a need to promote indigenous activities and solving problems at the local level. He further cited examples of how the pandemic has affected the people all over the world and how during this period the local, indigenous methods and activities has gone a long way in helping us sustain during the pandemic. The indigenous methods and activities if promoted on a large scale will not only help to sustain but will also help to find solutions to problems locally as well as globally.
