

Report on Department Initiative for Advanced and Slow Learners

The Department ensures every student is provided with holistic education focusing on intellectual, ethical, and social growth, aligned with the principles and values of Edmund Ignatius Rice. One of the ways the Department achieves this is through the Mentoring Programme of the College, where each student of the Department is assigned a faculty member to foster and guide the students which has “proven to be successful in providing students with an opportunity to open up to a responsible and concerned adult about their views and opinions with regards to their academic, social, and even individual concerns”.

In 2023-24, this programme has allowed the faculty members to identify students with a keen interest in research. These students participated in scientific research presentations and presented their work in a National Seminar and an Inter-college competition.

Recognizing the critical importance of both academic and non-academic knowledge and skills, the mentors also ensure the students are aware of and participate in programmes and workshops that are designed to impart such knowledge and skills.

Furthermore, one of the Department's key activities, essential for all students to engage in, is the “Student Seminar”. They allow students to “practise all language systems areas (vocabulary, grammar, discourse and phonology) and skills (speaking, reading, writing and listening)”, build confidence, develop skills in presenting, organizing, communicating, and research. The Department recognizes and rewards the efforts of students by presenting awards to the best presenters.

Allotment of Mentor-Mentee Department of Zoology, 2023
