10. NO OF PARTICIPANTS: 17

TEACHERS:

STUDENTS:

11. OUTCOME OF THE PROGRAM: The program was fully hands-on with the various electronic instruments and simple circuit designing with their applications. Students from science departments took keen interest and their active participation towards understanding electronic circuits and trying to implement these concepts in problems related to their subject was seen. Overall, the feedback response from students was good and we from the department look forward to organize many more such programs.
