

EDUCATIONAL VISIT

1. Name of the Institute/Organization visited : Indian Institute of Technology-Guwahati
2. Duration and date of visit : 1 day, 04th December 2018.
3. Any specific event : Initiative under DBT STAR COLLEGE SCHEME, funded by the Department of Biotechnology Ministry of Science and Technology, Govt. of India.
4. Name(s) of coordinator : Prof. B.L.Giri
5. Number of teachers accompanied : 04
6. Number of students participated : 28 (6th Semester)

7. Outcome of the visit:

The department of Electronics and Electrical Engineering coordinated our visit from IIT side and showed the departmental facilities along with SAMEER, Centre of Excellence for Sustainable polymers, Polymer Characterization lab and Electronics and ICT Academy.

At IIT (Ghy) the students got a chance to interact with many teachers and research scholars who are doing their research in their specialized field which ranges from electrical and electronic machinery to sustainable polymer development and the development of advance microwave tubes. The students found them fascinating and many took large interest by asking many questions to the research scholars, who were really supportive to the student and encouraging the students to build up interest in various scientific field.

This program has helped the student to explore the scientific world in a more practical sense and to increase their scientific horizon beyond classroom program.
