

One Day Health Camp

In conjunction with the Rural Camp 2022, the Department of Social Work-PG, St. Edmund's College Shillong organized a Health Camp in collaboration with Nongum Primary Health Centre, Mairang, Eastern West Khasi Hills on 25th May 2022. The Health Camp was held at Riangmang Upper Primary School with a purpose to enable the villagers to know their health status and also allow us to develop future strategies to address the health issues of the villagers in that Village.

The registration began at 10:00 AM with the screening of patients by the medical team comprising of Dr. Clever White Lyngdoh Nongbri, Medical Officer, Nongum PHC, along with one nurse and one pharmacist were on duty on that day. On this day, the team screened 175 patients in total, including 66 men and 109 women.

There are a number of diseases that the people in the area have to deal with, the most common being acute peptic disease, characterized by body pains, vomiting, difficulty breathing, feeling faint, unexplained weight loss, and a change in appetite. Among the patients who came for treatment on this day are older adult patients who have fever and high

blood pressure, and small children who have acute respiratory infections. Women with high blood pressure, cough, and headache are common among patients who are between the ages of 20-23 years.

The vast majority of patients received their medicine free of charge as prescribed by the doctor, so there was no shortage of medicine.

List of Male Participants
